Journal of ATMOSPHERIC AND SOLAR-TERRESTRIAL PHYSICS

Editor-in-Chief: Timothy L. Killeen

Published in Association with the International Union of Radio Science

U.R.S.I.

Pergamon

LIST OF CONTENTS

Number 1

Chaman-Lal: Sun-Earth geometry activity, geomagnetic and planetary F2 layer ion density Part I: Signatures of magnetic reconnection 3

O. Saka, H. Akaki, G. D. Reeves and **D. N. Baker**: Magnetic fields and particle signatures in the vicinity of nightside geosynchronous altitudes in the first one-minute-interval of π^2 onset: a case study 17

M. Gadsden: Polar mesospheric clouds seen from geostationary orbit 31

J. Xu, Y. Wang and **Y. Wang**: The loss of photochemical heating caused by gravity waves in the mesopause region 37

T. J. Immel, J. D. Craven and **A. C. Nicholas**: An empirical model of the OI FUV dayglow from DE-1 images 47

K. Krishna Moorthy and **A. Saha**: Aerosol study during INDOEX: observation of enhanced aerosol activity over the Mid Arabian Sea during the northern winter 65

Discussions

T. S. Jørgensen and **A. W. Hansen**: Comments on "Variation of cosmic ray flux and global cloud coverage — a missing link in solar-climate relationships" 73

H. Svensmark and **E. Friis-Christensen**: Reply to comments on "Variation of cosmic ray flux and global cloud coverage — a missing link in solar-climate relationships" 79

Number 2

A. Olsson and **P. Janhunen**: A statistical study of nightside inverted-V events using Freja electron data: implications for the current-voltage relationship 81

J. E. Titheridge: Modelling the peak of the ionospheric E-layer 93

D. Pancheva: Evidence of nonlinear coupling of planetary waves and tides in the lower thermosphere over Bulgaria 115

E. L. Afraimovich, Yu. V. Lipko and **B. O. Vugmeister**: Determining dynamic parameters of different-scale ionospheric irregularities over northern Siberia 133

International Geophysical Calendar 2000 (Final) 141

Book Reviews 147

Number 3

S. Kumar and **A. K. Gwal**: VHF ionospheric scintillations near the equatorial anomaly crest: solar and magnetic activity effects 157

V. Cooray: The modelling of positive return strokes in lightning flashes 169

D. Nunn and **H. J. Strangeways**: Trimpi perturbations from large ionisation enhancement patches 189

A.-M. Poussard and **Y. Corcuff**: Numerical simulation of LEP Trimpis observed at Poitiers, France, on signals from VLF transmitters 207

Book Review 225

Number 4

Ionosperic Alfvén Resonator

Preface 229

V. Y. Trakhtengerts, A. G. Demekhov, S. V. Polyakov, P. P. Belyaev and **V. O. Rapoport**: A mechanism of Pc 1 pearl formation based on the Alfvén sweep maser 231

P. P. Belyaev, S. V. Polyakov, E. N. Ermakova and **S. V. Isaev**: Solar cycle variations in the ionospheric Alfvén resonator 1985–1995 239

E. N. Ermakova, P. P. Belyaev, N. I. Belova and **V. Y. Trakhtengerts**: A sunset effect in variations of the eigenfrequencies of the ionospheric Alfvén resonator 249

V. Y. Trakhtengerts, A. G. Demekhov, P. P. Belyaev, S. V. Polyakov, E. N. Ermakova and **S. V. Isaev**: A mechanism of anticorrelation in the occurrence of ULF electromagnetic noise resonance structure and Pc 1 magnetic pulsations through the solar activity cycle 253

A. G. Demekhov, P. P. Belyaev, S. V. Isaev, J. Manninen, T. Turunen and **J. Kangas**: Modelling the diurnal evolution of the resonance spectral structure of the atmospheric noise background in the Pc 1 frequency range 257

V. Y. Trakhtengerts, P. P. Belyaev, S. V. Polyakov, A. G. Demekhov and **T. Bösinger**: Excitation of Alfvén waves and vortices in the ionospheric Alfvén resonator by modulated powerful radio waves 267

T. Bösinger, T. Pashin, A. Kero, P. Pollari, P. Belyaev, M. Rietveld, T. Turunen and **J. Kangas**: Generation of artificial magnetic pulsations in the Pc1 frequency range by periodic heating of the Earth's ionosphere: indications of ionospheric Alfvén resonator effects 277

K. Mursula, K. Prikner, F. Z. Feygin, T. Bräysy, J. Kangas, R. Kerttula, P. Pollari, T. Pikkarainen and **O. A. Pokhotelov**: Non-stationary Alfvén resonator: new results on Pc1 pearls and IPDP events 299

K. Prikner, K. Mursula, F. Z. Feygin, J. Kangas, R. Kerttula, T. Pikkarainen, O. A. Pokhotelov and **V. Vagner**: Non-stationary Alfvén resonator: vertical profiles of wave characteristics 311

Number 5

W. Schröder and **K.-H. Wiederkehr**: A history of the early recording of geomagnetic variations 323

B. Soukharev and **K . Labitzke**: The 11-year solar cycle, the sun's rotation, and the middle stratosphere in winter. Part I: Response of zonal means 335

D. R. Shklyar and **F. Jiříček**: Simulation of nonducted whistler spectrograms observed aboard the MAGION 4 and 5 satellites 347

I. Horvath and **E. A. Essex**: Using observations from the GPS and TOPEX satellites to investigate night-time TEC enhancements at mid-latitudes in the southern hemisphere during a low sunspot number period 371

Book Review 393

Erratum 395

Number 6

Thirty Years of Ionospheric Outflow Studies

Preface 397

R. W. Schunk: Theoretical developments on the causes of ionospheric outflow 399

C. R. Chappell, B. L. Giles, T. E. Moore, D. C. Delcourt, P. D. Craven and **M. O. Chandler**: The adequacy of the ionospheric source in supplying magnetospheric plasma 421

M. W. Liemohn, J. U. Kozyra, G. V. Khazanov and **P. D. Craven**: Effects of various transport processes on the streaming ion density during the first stage of plasmaspheric refilling 437

N. Yoshida, S. Watanabe, H. Fukunishi, T. Sakanoi, T. Mukai, H. Hayakawa, A. Matsuoka, Y. Kasahara, R. Fujii, S. Nozawa and **Y. Ogawa**: Coordinated Akebono and EISCAT observations of suprathermal ion outflows in the nightside inverted-V region 449

E. J. Lund, E. Möbius, C. W. Carlson, R. E. Ergun, L. M. Kistler, B. Klecker, D. M. Klumpar, J. P. McFadden, M. A. Popecki, R. J. Strangeway and **Y. K. Tung**: Transverse ion acceleration mechanisms in the aurora at solar minimum: occurrence distributions 467

O. W. Lennartsson, H. L. Collin, A. G. Ghielmetti and **W. K. Peterson**: A statistical comparison of the outflow of N_2^+, NO^+ and O_2^+ molecular ions with that of atomic O^+ ions using Polar/TIMAS observations 477

M. Øieroset, M. Yamauchi, L. Liszka and **S. P. Christon**: Energetic ion outflow from the dayside ionosphere and its relationship to the interplanetary magnetic field and substorm activity 485

B. A. Stevenson, J. L. Horwitz, B. Creel, H. A. Elliott, R. H. Comfort, T. E. Moore, P. D. Craven and **Y. J. Su**: Relationship of O^+ field-aligned flows and densities to convection speed in the polar cap at 5000 km altitude 495

T. E. Moore, B. L. Giles, D. C. Delcourt and **M.-C. Fok**: The plasma sheet source groove 505

R. F. Martin Jr, D. Delcourt, D. L. Holland and **M. J. Asbury**: Magnetotail particle distributions associated with pitch angle isotropization 513

H. Matsui, M. Nakamura, T. Terasawa, Y. Izaki, T. Mukai, K. Tsuruda, H. Hayakawa and **H. Matsumoto**: Outflow of cold dense plasma associated with variation of convection in the outer magnetosphere 521

R. M. Winglee: Mapping of ionospheric outflows into the magnetosphere for varying IMF conditions 527

Number 7

Y. Hobara, V. Y. Trakhtengerts, A. G. Demekhov and **M. Hayakawa**: Formation of electron beams by the interaction of a whistler wave packet with radiation belt electrons 541

E. L. Afraimovich, E. A. Kosogorov, L. A. Leonovich, K. S. Palamartchouk, N. P. Perevalova and **O. M. Pirog**: Determining parameters of large-scale traveling ionospheric disturbances of auroral origin using GPS-arrays 553

S. V. Veretenenko and **M. I. Pudovkin**: Latitudinal dependence of helio/geophysical effects on the solar radiation input to the lower atmosphere 567

R. M. Worthington, R. D. Palmer, S. Fukao, M. Yamamoto and **I. Astin**: Rapid variations in echo power maps of VHF radar backscatter from the lower atmosphere 573

V. Cooray, M. Fernando, T. Sörensen, T. Götschl and **A. Pedersen**: Propagation of lightning generated transient electromagnetic fields over finitely conducting ground 583

N. R. Thomson and **M. A. Clilverd**: Solar cycle changes in daytime VLF subionospheric attenuation 601

W. M. McRae and **N. R. Thomson**: VLF phase and amplitude: daytime ionospheric parameters 609

Book Reviews 619

Number 8

K. Labitzke and **H. van Loon**: The QBO effect on the solar signal in the global stratosphere in the winter of the Northern Hemisphere 621

S. Diaz, G. Deferrari, D. Martinioni and **A. Oberto**: Regression analysis of biologically effective integrated irradiances versus ozone, clouds and geometric factors 629

J.-L. Caccia, F. Bertin, B. Campistron, V. Klaus, Y. Pointin, J. van Baelen and **R. Wilson**: Cut-off low monitoring by the French VHF-ST-radar network during the ESTIME campaign 639

F. M. Vitt, T. E. Cravens and **C. H. Jackman**: A two-dimensional model of thermospheric nitric oxide sources and their contributions to the middle atmospheric chemical balance 653

F. M. Vitt, T. P. Armstrong, T. E. Cravens, G. A. M. Dreschhoff, C. H. Jackman and **C. M. Laird**: Computed contributions to odd nitrogen concentrations in the Earth's polar middle atmosphere by energetic charged particles 669

J. M. Forbes, S. E. Palo and **X. Zhang**: Variability of the ionosphere 685

R. G. Rastogi: Disturbance daily variation of electrojet current at Indian longitude sector 695

A. L. Brinca: A first assessment of the free energy in nongyrotropic plasmas 701

Book Reviews 711

Number 9

G. Di Donfrancesco, A. Adriani, G. P. Gobbi and **F. Cairo**: Lidar observations of the stratospheric aerosol during 1993 above McMurdo Station, Antarctica 713

I. P. Gabis and **O. A. Troshichev**: Influence of short-term changes in solar activity on baric field perturbations in the stratosphere and troposphere 725

N. A. Zolotukhina, N. M. Polekh, R. A. Rakhmatulin and **I. P. Kharchenko**: Geophysical effects of the interplanetary magnetic cloud on October 18–19, 1995, as deduced from observations at Irkutsk 737

C.-M. Huang: Midlatitude type 1 echoes observed with the Chung-Li 52 MHz radar 751

A. J. Ridley: Estimations of the uncertainty in timing the relationship between magnetospheric and solar wind processes 757

D. J. Della-Rose, J. J. Sojka, L. Zhu, R. W. Schunk and **M. David**: Driving the high-latitude ionosphere with variable time resolution "*K*-like" geomagnetic indices 773

H. Yang, N. Sato, K. Makita, M. Kikuchi, A. Kadokura, M. Ayukawa, H. Q. Hu, R. Y. Liu and **I. Häggström**: Synoptic observations of auroras along the postnoon oval: a survey with all-sky TV observations at Zhongshan, Antarctica 787

A. D. M. Walker: Coupling between waveguide modes and field line resonances 799

Number 10

The New Millennium Magnetosphere: Integrating Imaging Discrete Observations and Global Simulations

Preface 815

W. J. Burke: Magnetosphere—ionosphere coupling: selected topics 817

M. B. Moldwin: The challenge of placing in situ magnetotail observations into global context 825

J. Raeder, O. Vaisberg, V. Smirnov and **L. Avanov**: Reconnection driven lobe convection: Interball tail probe observations and global simulations 833

P. T. Newell and **S. Wing**: Remotely imaging the plasma sheet with low-altitude satellite clusters 851

R. E. Lopez, C. Goodrich, M. Wiltberger and **J. Lyon**: Solar wind—magnetosphere energy coupling under extreme interplanetary conditions: MHD simulations 865

S. M. Petrinec, D. L. McKenzie, W. L. Imhof, J. Mobilia and **D. L. Chenette**: Studies of X-ray observations from PIXIE 875

N. Østgaard, J. Stadsnes, J. Bjordal, R. R. Vondrak, S. A. Cummer, D. L. Chenette, M. Schulz, G. K. Parks, M. J. Brittnacher, D. L. McKenzie and **J. G. Pronko**: Global X-ray emission during an isolated substorm — a case study 889

P. Cson Brandt, S. Barabash, E. C. Roelof, C. J. Chase and **G. R. Wilson**: Energetic neutral atom imaging at low ($\leq$ 10 keV) energies from Astrid: observations and simulations 901

J. D. Perez, M.-C. Fok and **T. E. Moore**: Imaging a geomagnetic storm with energetic neutral atoms 911

S. Orsini, A. Milillo, I. A. Daglis and **S. Livi**: Simulation of ENA fluxes along the Geotail spacecraft orbit 919

R. W. Eastes, R. E. Daniell Jr. and **F. J. LeBlanc**: Coincident ultraviolet imager and energetic particle sensor observations of the continuous electron aurora 927

P. G. Richards, T. Chang and **R. H. Comfort**: On the causes of the annual variation in the plasmaspheric electron density 935

G. V. Khazanov, M. W. Liemohn, J. U. Kozyra and **D. L. Gallagher**: Global energy deposition to the topside ionosphere from superthermal electrons 947

Number 11

L. V. Egorova, V. Ya. Vovk and **O. A. Troshichev**: Influence of variations of the cosmic rays on atmospheric pressure and temperature in the Southern geomagnetic pole region 955

D. Y. Wang, W. E. Ward, B. H. Solheim and **G. G. Shepherd**: Wavenumber spectra of horizontal wind and temperature measured with WINDII, Part I: observational results 967

D. Y. Wang, W. E. Ward, B. H. Solheim and **G. G. Shepherd**: Wavenumber spectra of horizontal wind and temperature measured with WINDII, Part II: diffusive effect on spectral formation 981

G. M. Shved and **V. P. Ogibalov**: Natural population inversion for the CO_2 vibrational states in Earth's atmosphere 993

E. A. Rhoden, J. M. Forbes and **F. A. Marcos**: The influence of geomagnetic and solar variabilities on lower thermosphere density 999

A. S. Medvedev and **G. P. Klaassen**: Parameterization of gravity wave momentum deposition based on nonlinear wave interactions: basic formulation and sensitivity tests 1015

Number 12

Tutorial Lectures from the 1999 CEDAR Meeting and CEDAR-GEM-SHINE Session

Guest editorial..... 1035

D. L. Hysell: An overview and synthesis of plasma irregularities in equatorial spread *F*..... 1037

T. W. Schlatter: Variational assimilation of meteorological observations in the lower atmosphere: a tutorial on how it works..... 1057

N. U. Crooker: Solar and heliospheric geoeffective disturbances 1071

L. R. Lyons: Geomagnetic disturbances: characteristics of, distinction between types, and relations to interplanetary conditions..... 1087

A. D. Richmond and **G. Lu**: Upper-atmospheric effects of magnetic storms: a brief tutorial..... 1115

Number 13

S. H. Marsh, R. G. T. Bennett, W. J. Baggaley, G. J. Fraser and **G. E. Plank**: Measuring meridional mesospheric winds with the AMOR meteor radar 1129

H. G. Mayr, J. G. Mengel, C. A. Reddy, K. L. Chan and **H. S. Porter**: Properties of QBO and SAO generated by gravity waves..... 1135

J. W. MacDougall, P. T. Jayachandran and **J. M. C. Plane**: Polar cap Sporadic-E: part 1, observations 1155

J. W. MacDougall, J. M. C. Plane and **P.T. Jayachandran**: Polar cap Sporadic-E: part 2, modeling..... 1169

S. P. Namboothiri, P. Kishore, K. Igarashi, T. Nakamura and **T. Tsuda**: MF radar observations of mean winds over Yamagawa (31.2° N, 130.6° E) and Wakkanai (45.4° N, 141.7° E) 1177

D. R. Smith, E. R. Huppi and **J. O. Wise**: Observation of highly rotationally excited NO^+ emissions in the thermosphere..... 1189

J. W. Duff and **D. R. Smith**: The $O^+(^4S) + N_2(X^1\Sigma_g^+) \rightarrow NO^+(X^1\Sigma^+) + N(^4S)$ reaction as a source of highly rotationally excited NO^+ in the thermosphere..... 1199

P. Thejll and **K. Lassen**: Solar forcing of the Northern hemisphere land air temperature: New data 1207

Rapid Communication
K. Shiokawa and **Y. Kiyama**: A search for the springtime transition of lower thermospheric atomic oxygen using long-term midlatitude airglow data 1215

Number 14

Space Weather Week

Preface..... 1221

G. Siscoe: The space-weather enterprise: past, present, and future..... 1223

W. Kent Tobiska, T. Woods, F. Eparvier, R. Viereck, L. Floyd, D. Bouwer, G. Rottman and **O. R. White**: The SOLAR2000 empirical solar irradiance model and forecast tool..... 1233

O. C. St. Cyr, M. A. Mesarch, H. M. Maldonado, D. C. Folta, A. D. Harper, J. M. Davila and **R. R. Fisher**: Space Weather Diamond: a four spacecraft monitoring system 1251

F. Hill, W. Erdwurm, D. Branston and **R. McGraw**: The National Solar Observatory Digital Library — a resource for space weather studies 1257

Z. Smith, M. Dryer, E. Ort and **W. Murtagh**: Performance of interplanetary shock prediction models: STOA and ISPM 1265

R. V. Hilmer and **G. P. Ginet**: A magnetospheric specification model validation study: Geosynchronous electrons 1275

T. Paul O'Brien and **R. L. McPherron**: Forecasting the ring current index *Dst* in real time 1295

B.-H. Ahn, H. W. Kroehl, Y. Kamide and **E. A. Kihn**: Seasonal and solar cycle variations of the auroral electrojet indices 1301

D.H. Boteler, R. Pirjola and **L. Trichtchenko**: On calculating the electric and magnetic fields produced in technological systems at the Earth's surface by a "wide" electrojet 1311

A. C. Nicholas, J. M. Picone, S. E. Thonnard, R. R. Meier, K. F. Dymond and **D. P. Drob**: A methodology for using optimal MSIS parameters retrieved from SSULI data to compute satellite drag on LEO objects 1317

Number 15

K. Parameswaran, M. N. Sasi, G. Ramkumar, P. R. Nair, V. Deepa, B. V. Krishna Murthy, S. R. Prabhakaran Nayar, K. Revathy, G. Mrudula, K. Satheesan, Y. Bhavanikumar, V. Sivakumar, K. Raghunath, T. Rajendraprasad and **M. Krishnaiah**: Altitude profiles of temperature from 4 to 80 km over the tropics from MST radar and lidar 1327

P. Bencze, I. Almár and **E. Illés-Almár**: Further results referring to the neutral density depletions attributed to plasma bubbles 1339

R. S. Dabas, B. M. Reddy, D. R. Lakshmi and **K. I. Oyama**: Study of anomalous electron temperature variations in the topside ionosphere using HINOTORI satellite data 1351

H. J. Strangeways: Effect of horizontal gradients on ionospherically reflected or transionospheric paths using a precise homing-in method 1361

Y. Sahai, P. R. Fagundes and **J. A. Bittencourt**: Transequatorial F-region ionospheric plasma bubbles: solar cycle effects 1377

G. O. L. Jones, C. J. Davis and **R. E. Stockwell**: Dynasonde observations of electron concentration gradients above Tromsø 1385

S. D. Baker, M. C. Kelley, C. M. Swenson, J. Bonnell and **D. V. Hahn**: Generation of electrostatic emissions by lightning-induced whistler-mode radiation above thunderstorms 1393

T. Obara, M. Den, Y. Miyoshi and **A. Morioka**: Energetic electron variation in the outer radiation zone during early May 1998 magnetic storm 1405

Number 16

CMEs, Eruptions and Flares: Onsets and Relationships and Cycle 23 Solar Events and Heliospheric Consequences

Preface 1413

D. F. Webb: Understanding CMEs and their source regions 1415

A. C. Sterling: Sigmoid CME source regions at the Sun: some recent results 1427

L. van Driel-Gesztelyi, P. K. Manoharan, P. Démoulin, G. Aulanier, C. H. Mandrini, M. Lopez-Fuentes, B. Schmieder, S. Orlando, B. Thompson and **S. Plunkett**: Initiation of CMEs: the role of magnetic twist..... 1437

D. A. Biesecker and **B. J. Thompson**: Sympathetic flaring with BATSE, GOES, and EIT data..... 1449

N. Gopalswamy and **B. J. Thompson**: Early life of coronal mass ejections 1457

C. Delannée: Magnetic flux rope ejection: observation at 304 Å and comparison with recent models 1471

G. M. Simnett: The relationship between prominence eruptions and coronal mass ejections..... 1479

S. T. Wu, W. P. Guo, S. P. Plunkett, B. Schmieder and **G. M. Simnett**: Coronal mass ejections (CMEs) initiation: models and observations 1489

T. G. Forbes and **J. Lin**: What can we learn about reconnection from coronal mass ejections? 1499

M. Ohyama and **K. Shibata**: Timing and occurrence rate of X-ray plasma ejections..... 1509

T. I. Gombosi, D. L. DeZeeuw, C. P. T. Groth, K. G. Powell and **Q. F. Stout**: Multiscale MHD simulation of a coronal mass ejection and its interaction with the magnetosphere–ionosphere system..... 1515

A. R. Breen, B. J. Thompson, M. Kojima, D. A. Biesecker, A. Canals, R. A. Fallows, J. A. Linker, A. J. Lazarus, A. Lecinski, Z. Mikic, P. J. Moran and **P. J. S. Williams**: Measurements of the solar wind over a wide range of heliocentric distances — a comparison of results from the first three Whole Sun Months 1527

I. M. Chertok: Solar large-scale emitting chains: some CME-associated events..... 1545

G. Stenborg, L. G. Bagalá, O. H. Bauer, R. Fernández Borda, C. Francile, G. Haerendel, M. G. Rovira and **R. Schwenn**: First combined observations in the German–Argentinean solar observatory: correlations in quiet and eruptive phenomena at the limb 1553

Numbers 17–18

Golden Jubilee Issue

Preface 1561

M. J. Rycroft, S. Israelsson and **C. Price**: The global atmospheric electric circuit, solar activity and climate change 1563

G. A. Bazilevskaya, M. B. Krainev and **V. S. Makhmutov**: Effects of cosmic rays on the Earth's environment 1577

T. G. Shepherd: The middle atmosphere 1587

J. M. Forbes: Wave coupling between the lower and upper atmosphere: case study of an ultra-fast Kelvin Wave 1603

R. W. Smith: The global-scale effect of small-scale thermospheric disturbances 1623

A. S. Rodger and **M. J. Jarvis**: Ionospheric research 50 Years ago, today and tomorrow 1629

G. Ganguli, M. A. Reynolds and **M. W. Liemohn**: The plasmasphere and advances in plasmaspheric research .. 1647

Y. Kamide: From discovery to prediction of magnetospheric processes 1659

D. N. Baker: Effects of the Sun on the Earth's environment..... 1669

K. Suchy: Theory of high-frequency (HF) radio waves in the second half of the 20th century..... 1683

R. Barr, D. L. Jones and **C. J. Rodger**: ELF and VLF radio waves..... 1689

V. Y. Trakhtengerts and **M. J. Rycroft**: Whistler–electron interactions in the magnetosphere: new results and novel approaches..... 1719
